

M10 Cabinet

Power, wherever and whenever you need it. From planning and installation to operation – we are your reliable full-service provider for fuel cell systems.

Ensuring temporary and autonomous power supply for:

- Telecommunications, signaling systems, public safety radio networks, GSMR, FRMCS, mobile communications, 5G

Benefits:

- Minimal construction effort
- Low operating costs due to extended autonomy time
- Suitable for long-term and continuous operation
- External PV-system can be integrated

Technical specifications

System type	Backup and continuous power system
Design	Outdoor-cabinet
Fuel	Methanol
Fuel storage capacity	Integrated 420 liters
Dimensions (W x H x D)	Fuel storage cabinet: 1.470 x 1.200 x 2.005 mm Electrical cabinet: 800 x 800 x 1.988 mm
Weight	2.100 kg

Specifications	Resistance class RC 4 Integrated battery storage with 20 kWh
Ambient temperature	-30 °C to +50 °C
Rated power	2 kW continuous power output 10 kW peak power output
Output voltage	230 / 400 VAC (50 Hz) 24 / 48 VDC (± 1 V)
Energy density (from fuel)	840 kWh
