

DB Bahnbau Gruppe GmbH

The company at a glance

Last modified: April 2025

We build Strong Rail.

- Deutsche Bahn is pursuing an endeavour of fundamental importance: **to shift more traffic to rail** - for the climate, for people, for the economy and for Europe.
- And DB's overarching strategy **Germany needs Strong Rail** will lay the foundation we need to be successful in that endeavour.
- To make Deutsche Bahn and its rail infrastructure more robust, more powerful and more pioneering, Strong Rail needs a **strong partner: DB Bahnbau Gruppe**.
- **We are building Strong Rail** and thus making our contribution to getting the overarching strategy rolling.
- DB Bahnbau Gruppe is a **fully functioning competitor** in this.

Sustainable and innovative

- Shaping the future means taking responsibility. For people and for the environment.
- We have made it our mission to develop sustainable solutions for track work and to promote innovative ideas.

Our projects in the field of sustainability and environment:

Recycling

Processing of valuable building materials and resources

This is green

Forward-looking measures promoted by the Group

Alternative energy systems

Carbon neutral and independent with fuel cells

Our projects in the field of innovation and digitalisation:

Gleislabor track lab

Our innovation platform

Digitalisation | BIM

Transformation for shared progress

Figures

Employees	Approximately 4.000, plus 500 vocational trainees and cooperative education students
Revenues	Approx. EUR 1 billion per annum
Locations	Present at over 40 locations in Germany, head office in Berlin-Adlershof
Structure	Four service units, 29 technical units and three qualification centres ensure a wide-ranging, high-quality portfolio

Organisation and structure

**Managing Director for
Finance/Controlling**
Markus Faller

**Managing Director for
Engineering and
Chairman of the Board**
Markus Egerer

**Managing Director for
Human Resources**
Dr Doris Radatz

**Board of
Managing Directors**

Track Works SU
Jörg Fenske

**Electromechanical
Engineering SU**
Andreas Saft

**Prime Contractor
Projects SU**
Dr Ali A. Elahwiesy

Special Disciplines SU
Peter Grimm

**Four strong
service units**

Technical units

Main locations of DB Bahnbau Gruppe

- With over 40 sites, we not only have a nationwide presence, but are also quickly on the job anywhere in Germany.
- Our main locations are shown on the map.
- The company's head office and principal place of business is Am Studio 1 A, 12489 Berlin.

Track Works Service Unit

Really good tracks.

- The **Track Works** Service Unit takes care of getting the rails on the track.
- Its core tasks are:

Track laying

- Construction, renewal and maintenance of tracks and points
- Replacement of rails, installation of expansion joints
- Bridge sleepers
- Concrete slab track
- Trackside construction work in civil and underground engineering

Track welding

- Aluminothermic joint welding
- Joint welding using the arc method
- Weld-based reconditioning of tracks and points
- Manufacturing of seamless tracks and points using de-stressing methods
- Manufacturing and repair of insulated rail joints

Machine technology

- Milling, conveyor and tamping technology
- Logistics
- Machine maintenance

Electromechanical Engineering Service Unit

Ever-present. Future-oriented. Our technical systems.

- The Electromechanical Engineering Service Unit supplies the line with all the **technical systems** needed for rail operations to run smoothly.
- This includes:
 - **Energy systems**
 - Overhead line equipment
 - Electrical power systems
 - Underground cable installation
 - Third rail
 - Alternative energy systems
 - **Train control systems**
 - Control-command and signalling
 - Telecommunications systems
 - **Design and development**
 - Technical equipment design
 - Production and development

Special Disciplines Service Unit

Built to connect.

- The Special Disciplines Service Unit supplies the line with all **structural engineering** products and **recycling services**.
- They include the following:
 - **Bridges and signal brackets**
 - Steel, reinforced concrete and provisional bridges
 - Signal brackets
 - **Passenger transport facilities**
 - Platform facilities and temporary platforms
 - **Solid constructions**
 - Retaining walls, concrete repair and fire protection
 - **Recycling**
 - Collection of materials removed from the permanent way across Germany for reprocessing and recycling

A photograph of railway workers in orange safety gear working on tracks. The workers are wearing orange high-visibility jackets and helmets. One worker in the foreground is using a bucket to apply material to the tracks. The tracks are made of steel rails and wooden sleepers. The background shows more tracks and workers, slightly out of focus.

Thank you

Bahnbau Gruppe

Wir bauen die starke Schiene.
